Create & View Assignments Using Library

1. Using the library is another way to create assignments. More importantly, this section of the platform is also a terrific tool to use for modeling, reviewing and teaching digital test strategies.

To access material, select the Library tab located on the left side of your dashboard.

2. If your Library contains several products and grade levels, use the filtering system to the left of the screen for easy access to content.

 For this example, we will view Science. Please note that all subject and product packages are separated by Reporting Categories.
 Additionally, in the illustration shown, you'll notice gold-colored packages. These represent Teacher Guides, valuable resources designed to help you seamlessly integrate

STAAR MASTER materials into your daily classroom instruction.

4. To create and view an assignment from the Library, click the Reporting Category you want your students to work from.

5. To expand and view the questions, click the plus sign next to the product type.

6. As shown here, standards are located on the left column, the item types are located in the middle column, and the boxes to select and assign are to the right. Click the top box of the Exercise number to assign to your students.

7. In this view, you can preview all selected questions at once by clicking the "Present Selected" banner in the lower right corner.

8. This is an excellent way to review materials and model for your students, walking them through ways to interact with STAAR MASTER Interactive.

Click the right arrow at the bottom of your screen to navigate through each question.

INTRODUCTION TO STUDENT PRACTICE BOOK

9. Within the demo-mode, you can interact with the questions, model for your students, and use as a teaching tool.

10. To exit the demo-mode, click the exit presentation icon to the right.

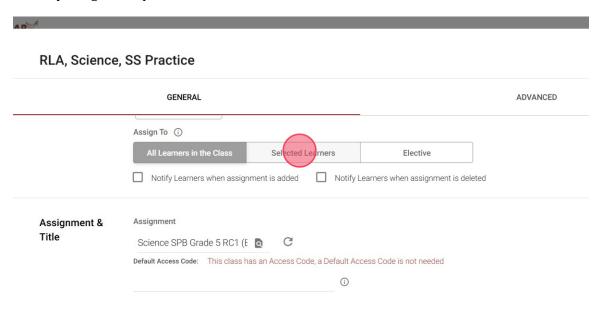

11. To assign the questions, click the "Assign Selected" banner.

12. In the pop-up, select the class or classes you wish to assign to.

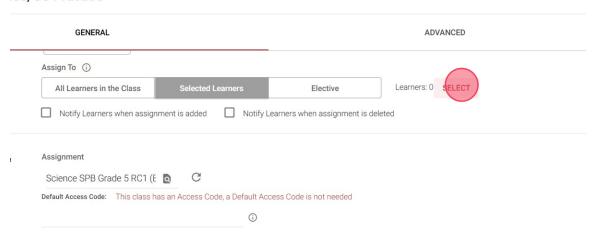

13. In the Assignment Editor pop up, it's defaulted to all of the learners. But if you want to only assign to a specific set of students, click "Selected Learners,

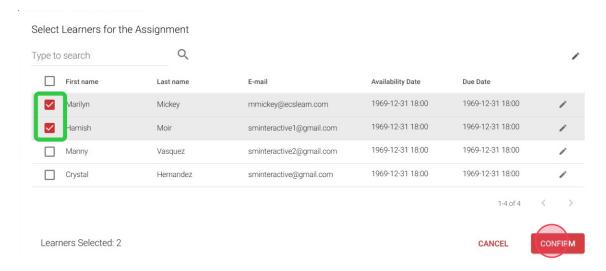

14. Then click the red "SELECT" banner to access your roster.

ice, SS Practice

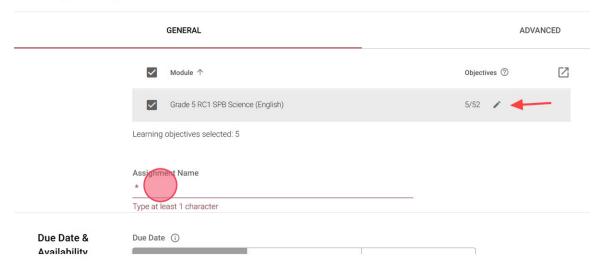

15. Check the box next to the students who will be assigned this task. Then click "Confirm."

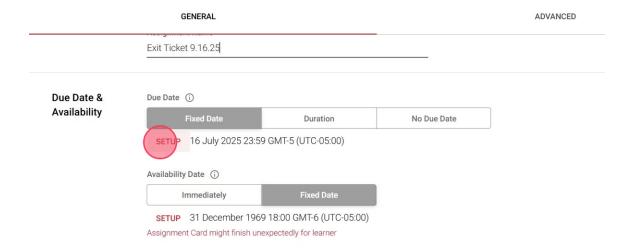

16. In the Library, you have already selected the questions you want to assign, so it is unnecessary to make changes to your module. However, if you need to make edits, click the pencil icon under the "Objectives" column to make further revisions. Please note that you will need to provide a name for your assignment to move forward.

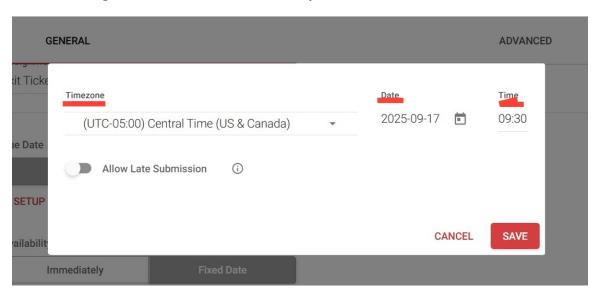

RLA, Science, SS Practice

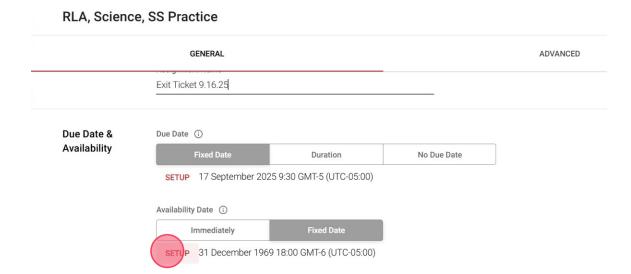

17. Next, determine the due date by selecting the "SETUP" button.

18. In the SETUP pop-up, select your time zone, due date and time. You can also determine whether you will accept late assignments after a certain number of days or indefinitely. Please note that if you have a due date without allowing late submissions, assignments will no longer be available to students after your set date and time.

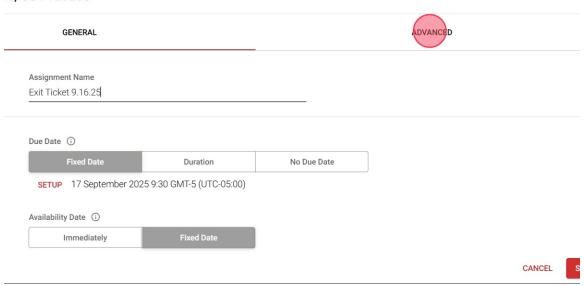

19. If you are pre-planning assignments for a later date, use the "SETUP" banner to schedule the Availability Date.

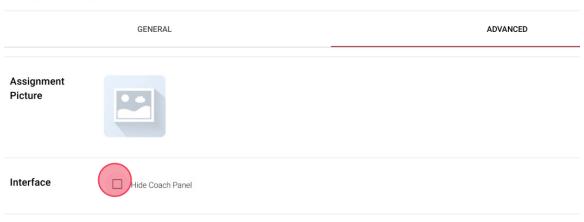

20. To turn off text to speech options, select the advanced tab in the upper right corner.

e, SS Practice

21. Under the "Advanced" tab, scroll down to check the box "Hide Coach Panel." This will remove the speech-to-text capabilities on the students' dashboards.

RLA, Science, SS Practice

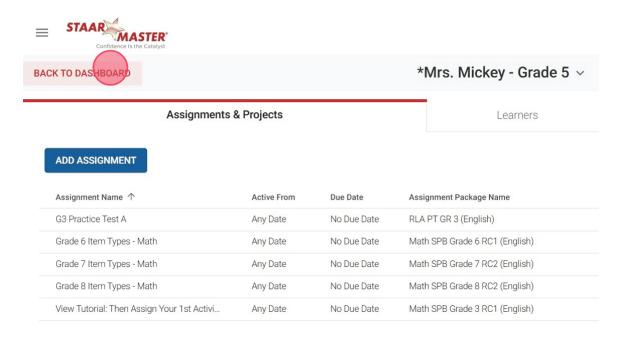

22. Once you are finished making changes to your assignment, click "Save" to save and deploy the assignment.

S Practice

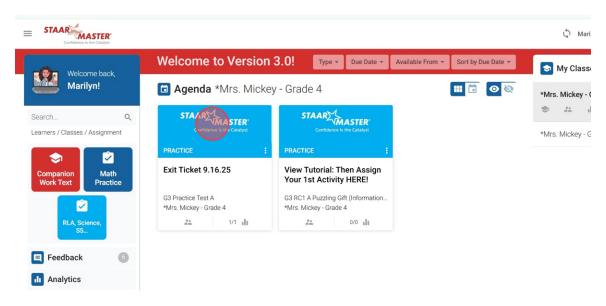

23. To return to your dashboard, click the "BACK TO DASHBOARD" banner in the left corner.

24. If you need to make changes to the assignment, delete or add students before they have accessed it, click the assignment card to return to the Assignment Editor pop-up and make the necessary revisions.
